### Story:

The Joe Patrol Pack is a lightweight water repellent backpack that includes one large zippered pouch (with internal pouch), one buckled cargo pouch and removable straps. Our custom refurbishing includes a tough rock enzyme wash to soften the material and each backpack is finished with an individually numbered WCF ID tag. We have removed any extra unnecessary straps or buckles from these bags to make them more lightweight and civilian-friendly.

We found a spattering of miscellaneous items left in these bags, from whistles to canteen covers. An assortment of these bags will include an envelope with a recovered item enclosed.
